COSYS complete solution - Advantages/Facts

- COSYS Software:
  - diverse application possibilities with the latest technologies (including cloud and use of smartphones with COSYS Performance scanning via the device camera)
  - Manufacturer, device and technology-independent
  - Flexible framework (to dynamically switch additional processes upstream or downstream, such as provisioning or delivery including signature capture)
  - specific adaptation possibilities of the COSYS software to the individual customer process
  - COSYS WebDesk (browser-based post-processing and administration software) with modern design, features and functions
  - Various connection options and interfaces to other customer systems

- COSYS also offers an extensive range of hardware services for:
  1. Hardware sale (new/used)
  2. Service & repair, hardware-related services
  3. Hardware rental
  4. Concept development for taking back old equipment

  and tailored service and maintenance contracts for the complete system supplied.
